San Pablo Bay Watershed Restoration Study

PUBLIC MEETING

TUESDAY, AUGUST 10, 1999 at 6:00P.M.

John F. Kennedy Library
505 Santa Clara Street
Vallejo, CA

Joseph Room

The Coastal Conservancy and the Corps of Engineers, in collaboration with the San Pablo Baylands Partnership, the Bay Institute and other watershed partners, are embarking on a Feasibility level program to provide technical, planning, and design assistance to agencies and local organizations for restoration projects in the San Pablo Bay watershed. One of the primary purposes of the program is to enable local governments and private organizations to restore wetlands, riverine, and other wildlife habitats in the San Pablo Bay Watershed. The program will also evaluate other benefits, such as, flood protection, dredged material reuse, water quality and reuse opportunities, etc.

Interested parties are encouraged to attend the public meeting and inform the Conservancy and the Corps of potential restoration opportunities throughout the San Pablo Bay watershed. Information provided at the meeting will help guide the direction of the program.

For additional information, please visit the Corps of Engineers web site at www.spn.usace.army.mil/sanpablobay, or call Dick Wayman, Coastal Conservancy Project Manager, at 510-286-4182, Roger Golden, Corps of Engineers Project Manager, at 415-977-8703, or Karen Rippey, Corps of Engineers Planner, at 415-977-8537.

Sincerely,
